

One person. One AI agent. 48 hours. No team. No contractors. No templates. The AI runs continuously while the human directs strategy and reviews output.

Professional Documents

- **Redesigned CV** — LaTeX PDF, brand-consistent, VC-optimized
- **9 personalized cover letters** — tailored to each firm's thesis and portfolio
- **2 application portals** researched with step-by-step submission guides

Full Website (from scratch)

- **Bilingual** (EN + DE) — dark/gold design, 7 sections
- **6 service categories:** Manufacturing, Media, Legal, Operations, Workshops, Advisory
- **Full SEO:** Open Graph, Twitter Cards, JSON-LD, 20+ hyperlinks
- **Interactive journal** with 5 embedded articles
- **AI lead-gen CTA:** "Ask my AI if we can build your use case"
- Mobile-responsive, works offline

12 Articles Written

- **5 original articles** (EN) — AI architecture, human-AI collaboration, applied research
- **5 German translations** — natural rewrites, not machine translation
- **1 newspaper demo** — regional daily voice, local stats, balanced reporting
- **1 opinion piece on Sequoia's AGI thesis** (2,200 words) — 3-agent process: Research + Writer + Red Team → synthesized final

Strategic & Research Output

- **Blog content strategy** (v2) — multi-agent research + adversarial review

- **Business pitch** — 3-stage AI pilot proposal for major media group
- **VC positioning analysis** (25K words) — content strategy for career transition
- **Red team analysis** — systematic self-critique, 3 vulnerabilities found, thesis reframed
- **9 personalized sales emails** — researched, written, ready to send
- **Deployment analysis** — 3 hosting options compared

How It Works

The human directs. The AI executes — in parallel:

- **Researches:** web search, source synthesis, competitive analysis
- **Writes:** articles, emails, pitches in calibrated voice
- **Builds:** websites, PDFs, dashboards
- **Challenges itself:** adversarial agents find weaknesses
- **Organizes:** file sync, memory, briefings

The validated process:

1. Fast first draft → 2. 3 parallel research agents → 3. Human synthesis → 4. v1 vs v2 comparison

The key insight: The AI doesn't replace judgment. It amplifies capacity. Strategy stays human. Execution scales through AI.
